

#### **SD X40 Ribbon Installation Guide (English Version)**

Watch the full video here: https://youtu.be/kpeKZR0F6F0

#### 1. Identify Printer Model and Ribbon Direction

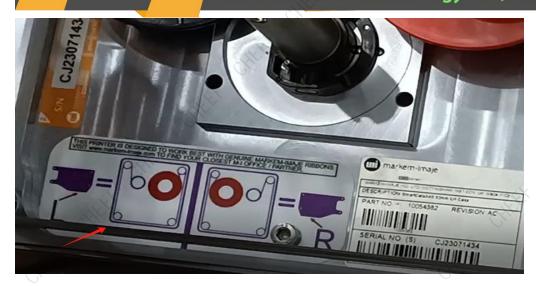

Before installing the ribbon, identify your SD X40 printer model and the winding direction. SD X40 supports both Left-Hand (LH) and Right-Hand (RH) models. In the video, the printer is a 32mm LH model, meaning the ribbon must follow a left-hand winding path.

#### 2. Ribbon Winding Path

The correct winding path is from the left (supply reel) to the right (take-up reel). Align the red arrows or markers to ensure the ribbon winds correctly.

# Suzhou Cheef Technology CO.,LTD

#### 3. Load the Ribbon into the Printhead

Once wound, place the ribbon cassette into the SD X40 printer module. Ensure it is positioned accurately and locked into place securely.

## Suzhou Cheef Technology CO.,LTD

#### 4. Confirm System Recognition

After placement, rotate the adjustment knob. The printer controller will detect the ribbon. If the screen displays 'OK' and 'Ready', installation is complete.

### Suzhou Cheef Technology CO.,LTD

### 5. Begin Printing

Once the ribbon is recognized and ready, the printer can begin printing immediately once CHILLE CHILLE
