****How to Edit Messages on the Videojet 3340 Laser Marking Machine Software (Older Version)****

****Introduction****

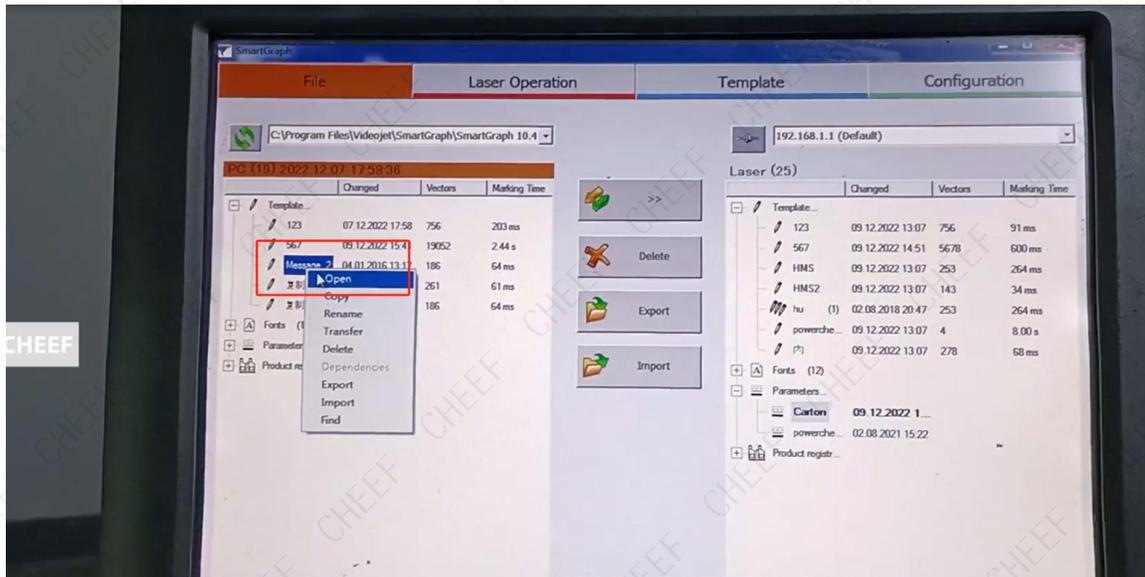

Editing messages in the Videojet 3340 laser marking machine (older version) software is essential for creating precise and customized markings. This guide provides a detailed walkthrough of creating, editing, and managing text, barcodes, and QR codes, ensuring both beginners and experienced operators can navigate the process with ease. Follow this tutorial to efficiently edit messages in the Videojet 3340 software to meet various marking needs.

****Message Editing Guide****

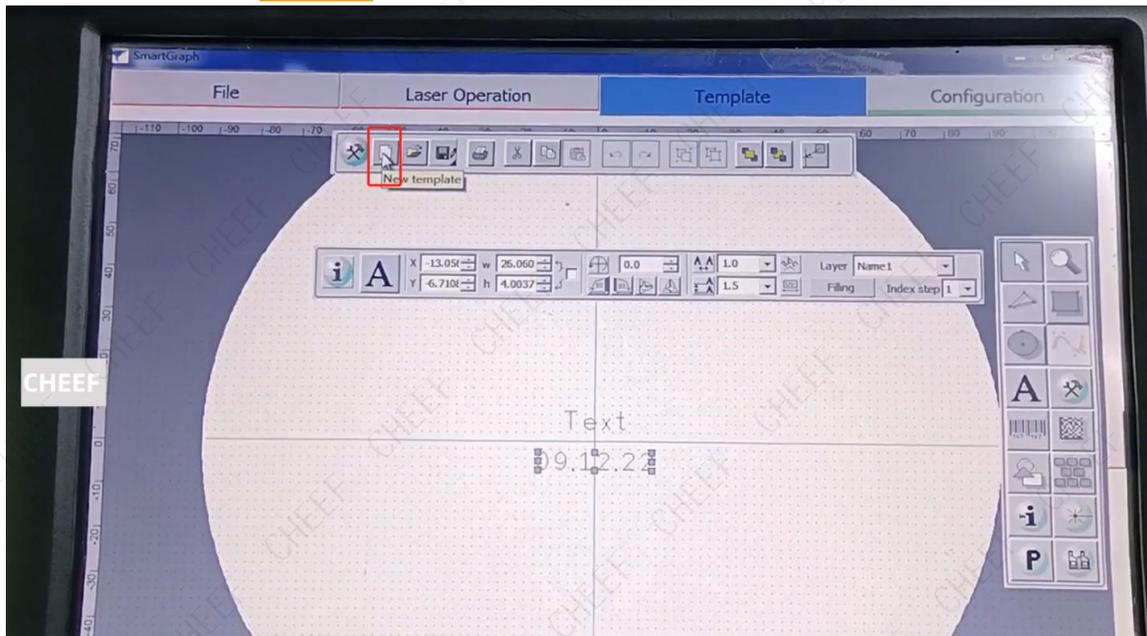

****Creating a New Message****

Start by creating a new message on the computer.

- In the software's message management interface, right-click and select "New Blank" to create a blank message, or choose an existing message to modify.
- If modifying an existing message, right-click and select "Open," then select and delete unwanted content to clear it.

****Adding and Editing Text****

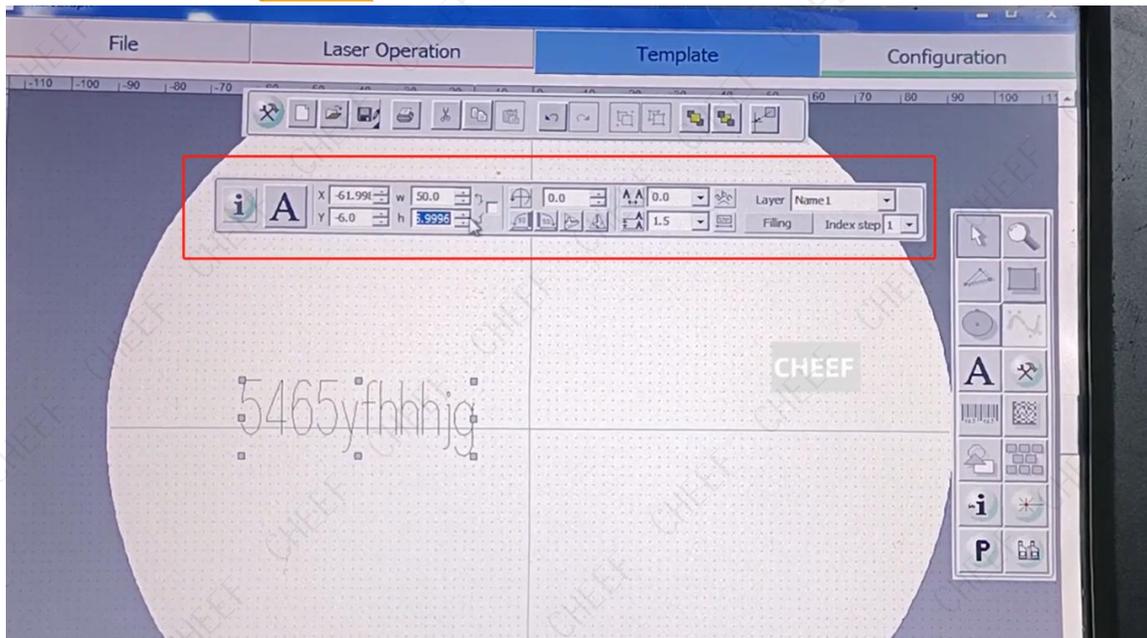

Add text and adjust its content and style.

- Select the "Text" tool (click the "A" icon) and draw a box in the blank area to generate default text.
- Double-click the text box, delete the default content, and enter the desired content.
- Click elsewhere to confirm the input.
- Drag the text box with the mouse to adjust its size, length, and width.
- In the character spacing settings, change the default value from 0 to 3 to increase spacing between characters.

****Adjusting Text Orientation and Mirroring****

Set text direction and mirroring effects to meet various marking requirements.

- In the direction settings, enter “90” to adjust the text to a vertical orientation, or “0” to revert to horizontal.
- Enable the mirroring option, which, combined with rotation, allows for various text directions (e.g., upside-down or angled).

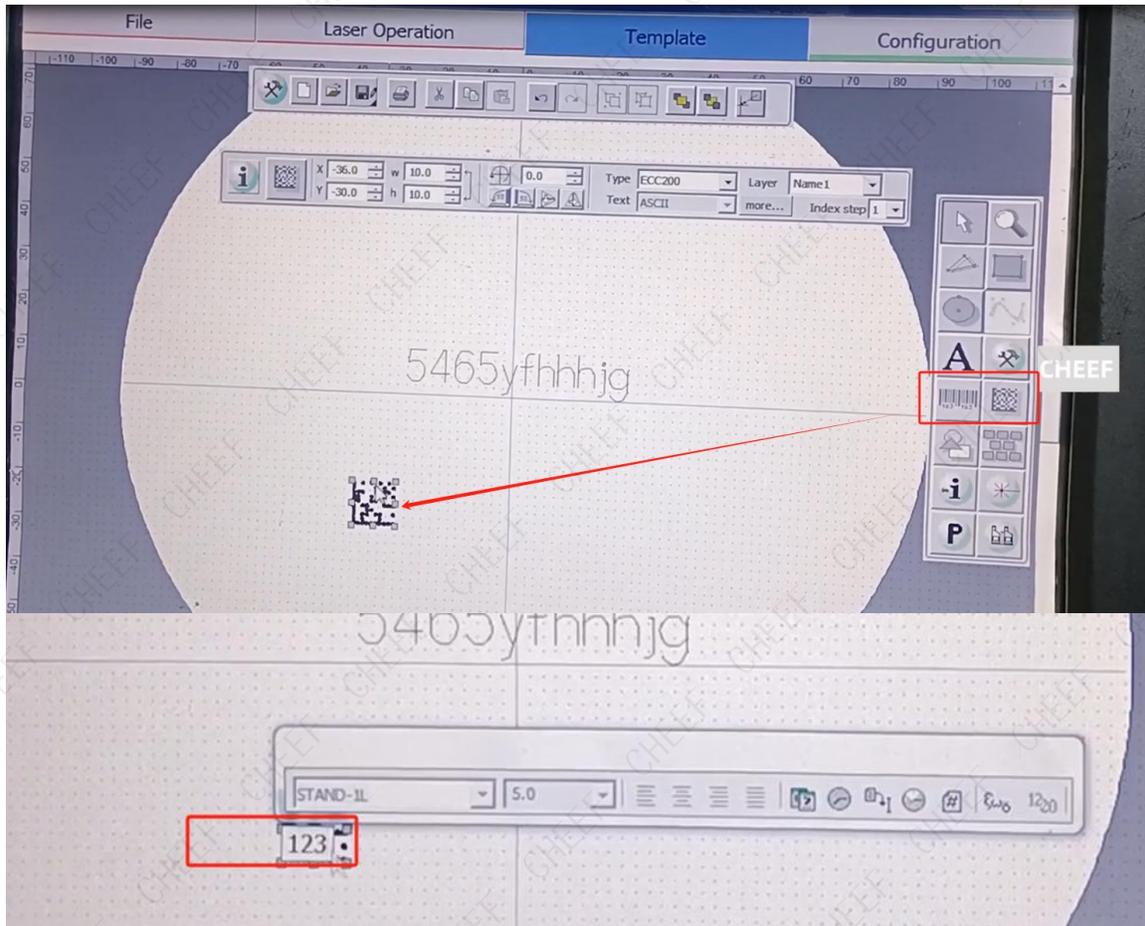

Adding Barcodes and QR Codes

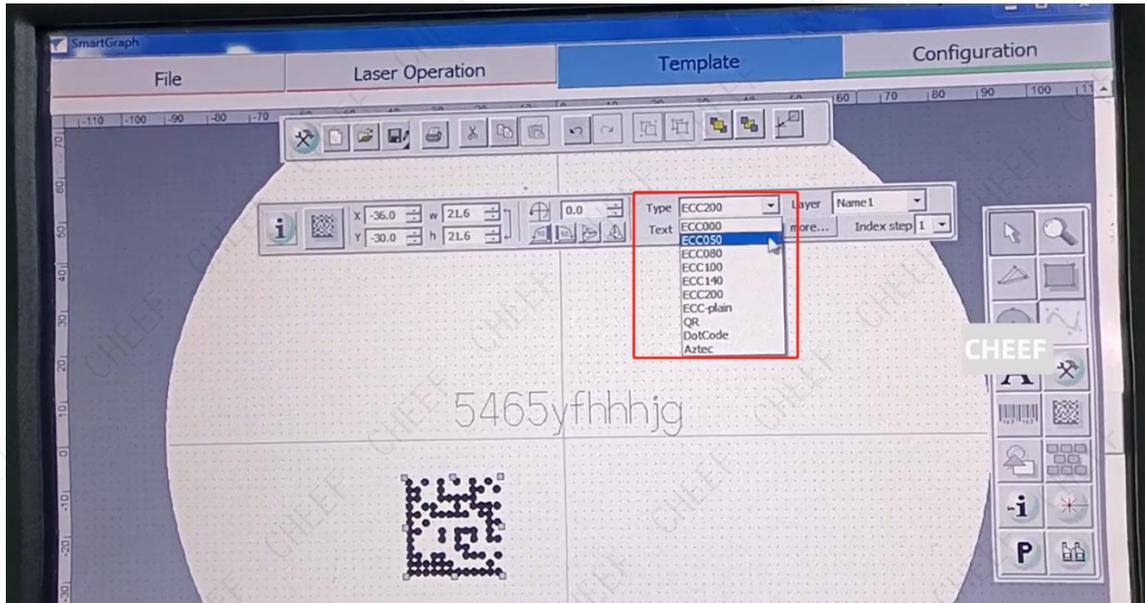

Add barcodes or QR codes to the marking.

- Select the "QR Code" tool and draw a box in the blank area to generate a QR code (default content is "123").
- Double-click the QR code, modify the content, and click "OK."
- Drag with the mouse to adjust the QR code size.

Suzhou Cheef Technology CO.,LTD

- In the settings panel, choose from various QR code or barcode types, which apply automatically upon selection.
- Drag the barcode to adjust its size, or modify it further through parameter settings.

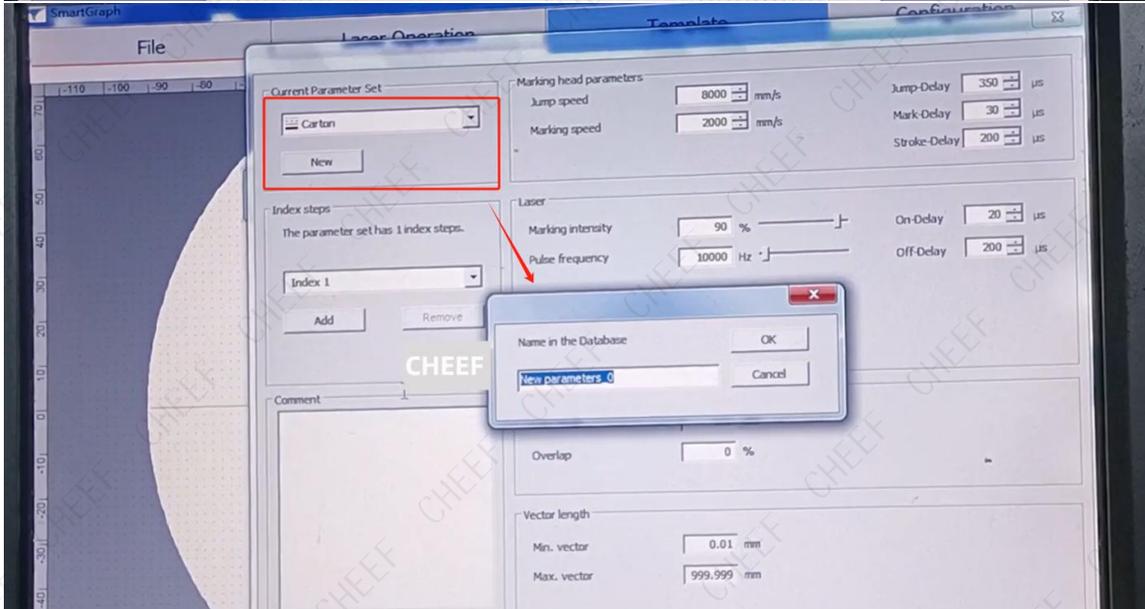

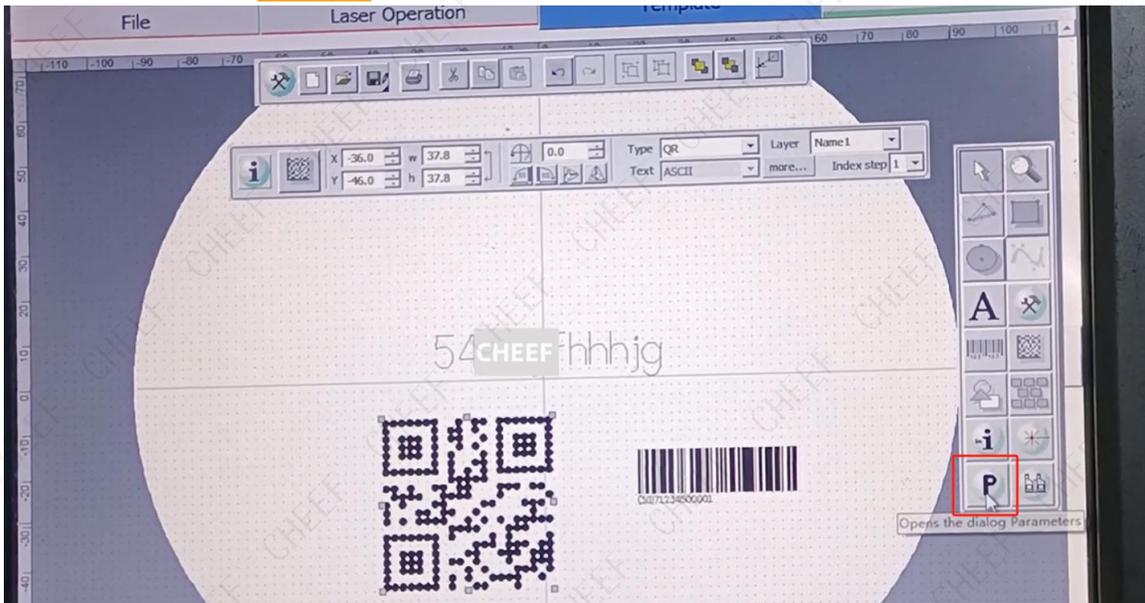

Configuring Engraving Parameters

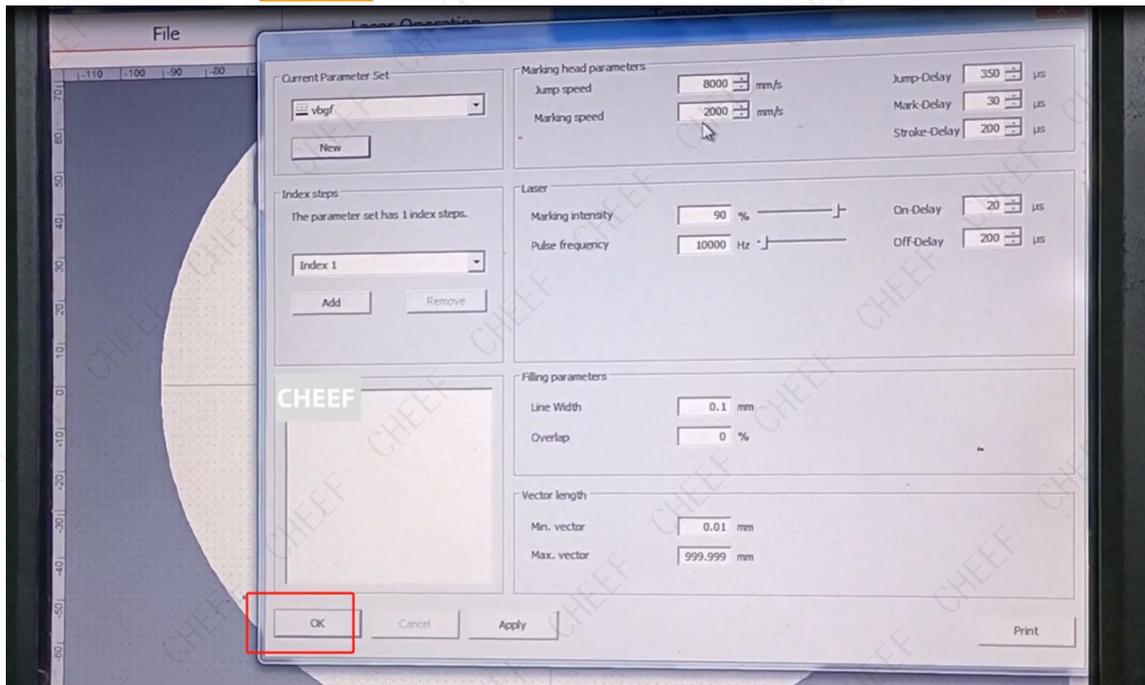

Adjust engraving parameters to optimize print quality.

- Click the parameter icon ("P"), select "New," name the parameter, and click "OK."
- Set the following parameters:
 - ****Jump Speed****: Controls the laser head's movement speed.
 - ****Engraving Speed****: Controls marking speed; higher values increase speed.
 - ****Power****: Affects marking depth; higher values produce deeper marks.
 - ****Delay****: Adjusts delay time for dynamic printing.
- For dynamic (flight) printing, fine-tune jump speed and engraving speed until the print quality is satisfactory.
- Click "OK" to save parameters after adjustments.

Saving and Managing Messages

Save or manage created messages for future use.

- Click "Save" to save the message directly, or select "Save As" and rename it (e. g., "Message 2").
- Delete a message: Select the unwanted text or QR code and press the "Delete" key on the keyboard.
- The software supports any input method available on the computer, allowing content in various languages.
- Saved messages appear in the message list, ready for retrieval.
