****How to Edit Messages on the Videojet 3640 Laser Marking Machine Software****

****Introduction****

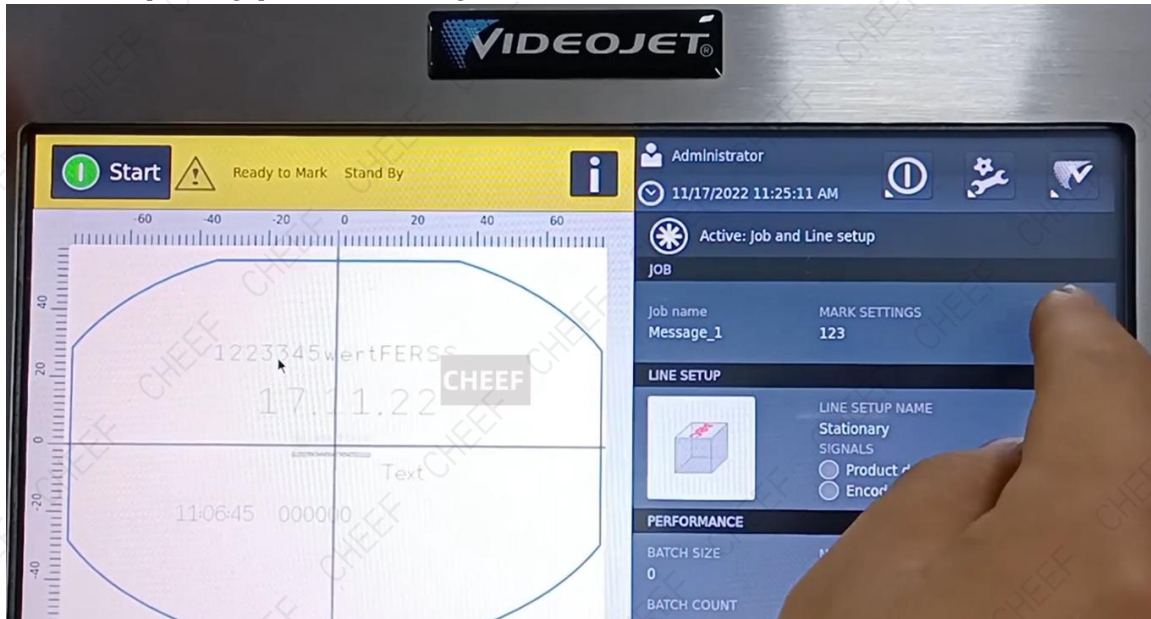

Editing messages in the Videojet 3640 laser marking machine software is a key step for creating customized engraving content. This guide provides a detailed walkthrough of viewing, editing, creating, and deleting message content (including text, dates, times, QR codes, and serial numbers), ensuring both beginners and experienced operators can complete the process with ease. Follow this tutorial to efficiently adjust the message settings in the Videojet 3640 software to meet your needs.

****Message Editing Guide****

****Viewing Message Content****

Start by reviewing the current message content and its parameters.

- Launch the Videojet 3640 laser marking machine software and navigate to the main interface.
- In the main interface, locate and click the message name to view its engraving settings and corresponding parameters (e.g., font, size, width).

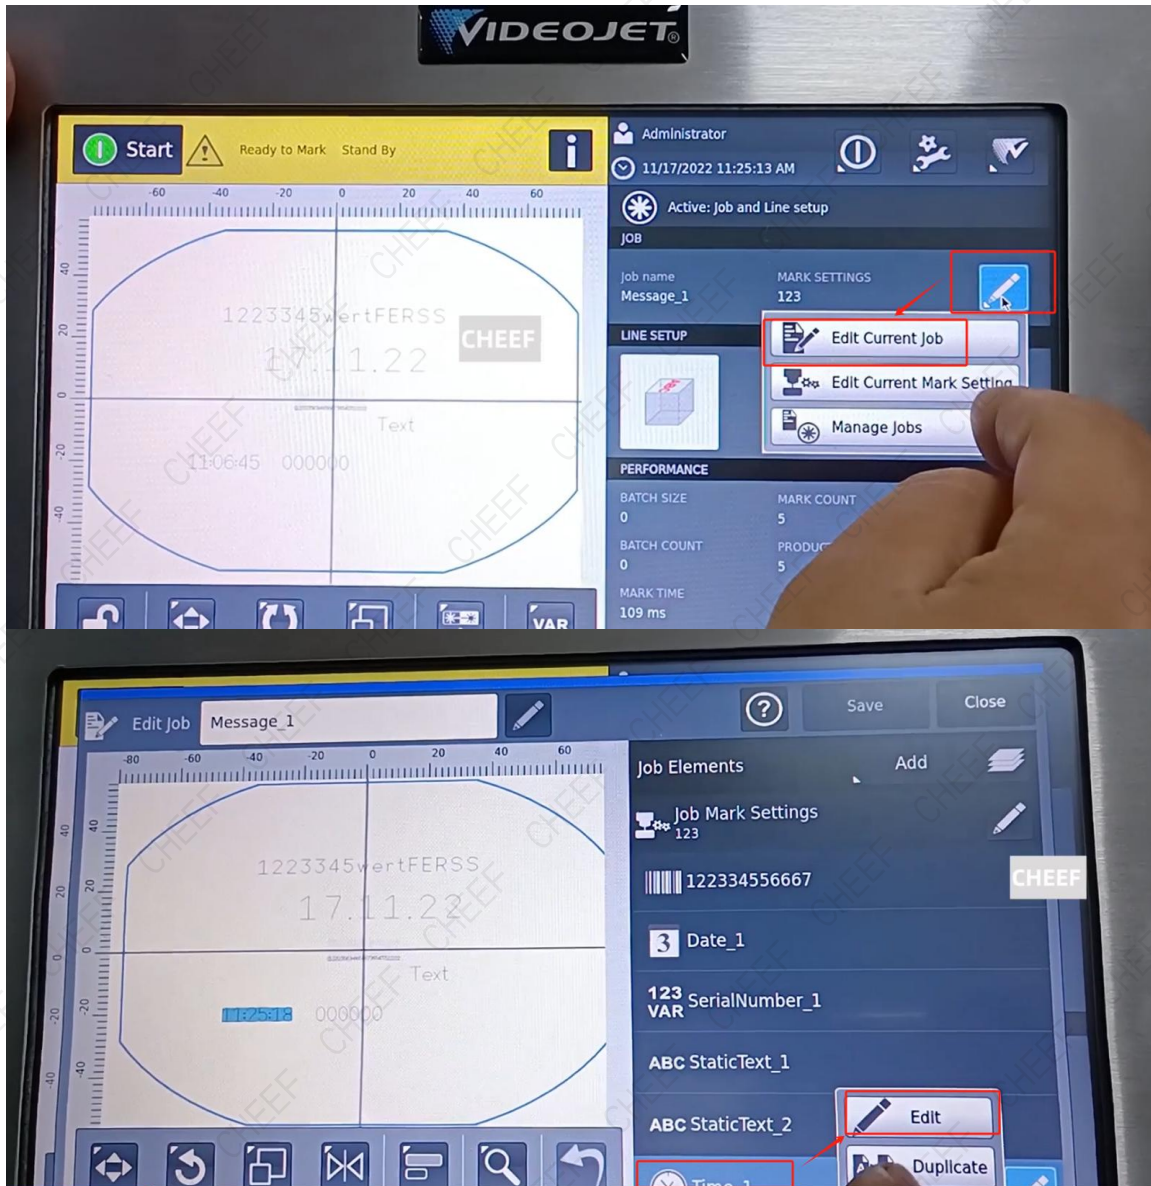

****Editing Existing Messages****

Modify text, time, or other elements in the current message, including font, size, and format adjustments.

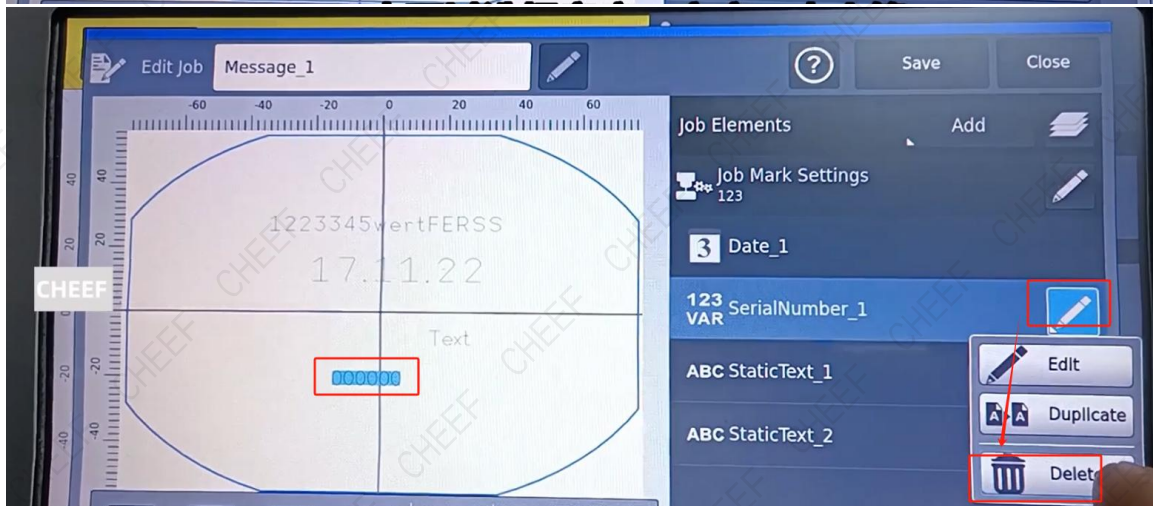

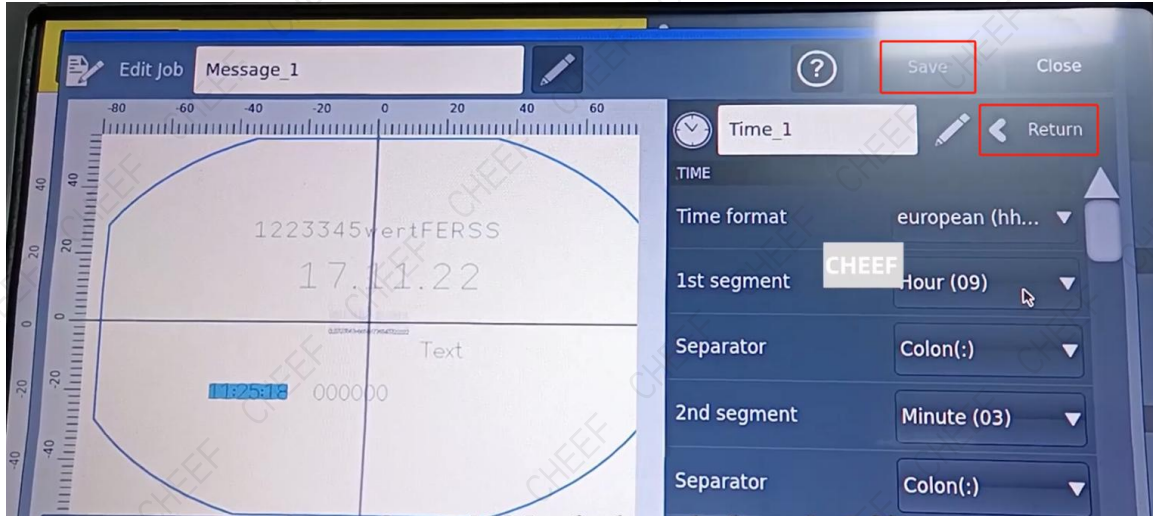

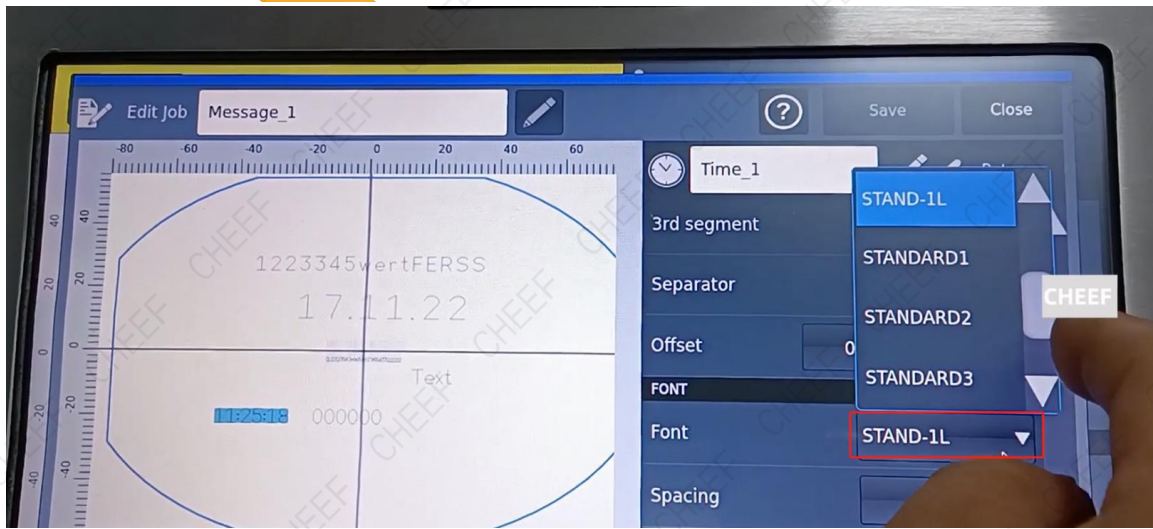

- In the message interface, select the message to edit and click the “Edit Current Message” button.
- Review existing character segments (e.g., five existing segments, with six time formats available).

Suzhou Cheef Technology CO.,LTD

- To edit time, click the “Edit” button, adjust character size, width, height (e.g., change height from 4.43 mm to 7 mm), or select a different font from the font list.
- Adjust formats (e.g., orientation, position) as needed.
- After editing, click “Return” to save changes to the current segment, or click “Delete” to remove unwanted elements.

****Creating New Message Elements****

Add new text, dates, times, QR codes, or serial numbers.

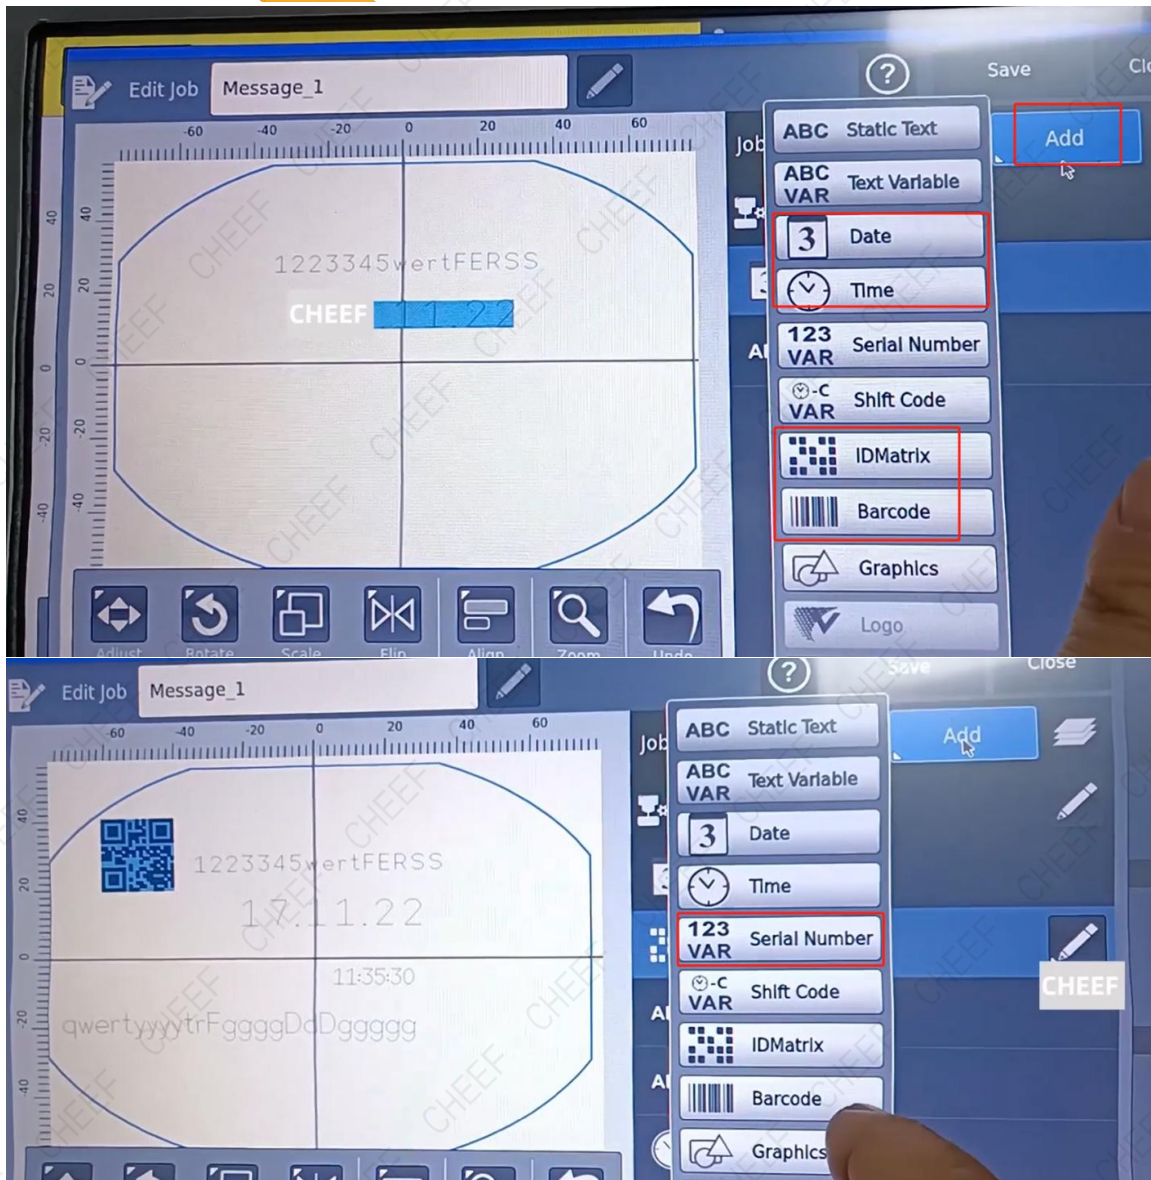

- ****Adding Text****: Click the “ADD” button, select “Text,” and click a blank area to create new text. Enter content, choose font, size, height, width, etc., adjust the position within the engraving area, and click “OK” to save.
- ****Adding Date or Time****: Click “ADD,” select “Date” or “Time,” adjust size, font, orientation, etc., and click “OK” to save.
- ****Adding QR Code****: Click “ADD,” select “DM Code,” choose the QR code type, modify size and content (i.e., what appears when scanned), and click “OK” to save.
- ****Adding Serial Number****: Click “ADD,” select “Serial Number,” and click a blank area to create. Default is three zeros; change to six nines for a six-digit serial number, set current, start, and end values (in millimeters), adjust size and position within the engraving area, and click “OK” to save.

Deleting Message Elements

Remove specific message elements.

- Select the element to delete (e. g., text, date, or serial number) and click the “Delete” button.
- Confirm the deletion, and the element will be removed.

Saving and Finalizing

Save all changes or return to save only the current segment's modifications.

- After editing, click “Save” to save the entire message content.
- To save only the current segment's changes, click “Return.”
- Close the editing interface to complete the process, ensuring all content is within the engraving area.
